- Designed specifically for the application to Australian cementitious float bases
- Produced using a quality controlled manufacturing process.
- One bag solution, ProRoc Multifinish only needs to be added to clean water.
- No shrinkage or cracking whilst setting on approved substrates.
- ProRoc can be applied after cementitious float base is cured, generally 24 to 48 hours after application.
- Great workability, performance and finish.
- Typically dries within 7-10 days. Refer to paint manufacturer specification prior to paint application.
- Pro Roc Multifinish is manufactured under a Quality System independently audited conforming ISO 9001:2015
- Standard reference:
  - AS 2592-1983
  - HB 161
